Retail

Perfect validation security

Anti-stringing protection and protocol encryption for high manipulation security

Unique MFT coin validation technology for highest coin security

Highly flexible through multiple models, interfaces and sorters

Most flexible and secure 3,5" coin validator

G-13.mft

The NRI G-13.mft sets the industry standard. By using the unique MFT validation technology upmost coin security is guaranteed. The G-13.mft has high flexibility through different models, interfaces and sorters.

High security:

- Highest coin validation security using the unique MFT Multi-Frequency-Technology
- Detection of coin material by three coil pairs together with proven optical diameter measurement
- Simultaneous evaluation of 24 measurement parameters for 32 coin channels
- Protection against string manipulation
- Optical monitoring of coin path for higher security

Flexibility:

- Inhibit of single coins or coin groups via DIL switch
- Teach function for up to 8 coins/tokens as standard
- Powerful WinEMP software for downloading complete device and coin configuration
- On site tool HENRI+ to easily update coin and configuration data sets

Versatility:

- Multiple machine interfaces available
  - serial S1
  - serial MDB
  - ccTalk, also via USB connection
  - parallel, also binary or serial impulses
  - SGI (Simple Gaming Interface) with fast coin acceptance for Casino applications
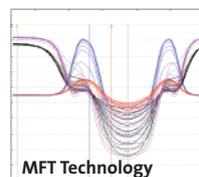

Accessories:

- Midi and mini front plate
- Wake-up sensor for low-power applications
- s² 3-way sorter Standard
- d² 3-way High Speed Sorter

Technical data:

Dimensions:	Height 102 mm, Width 89 mm, Depth 52 mm
Coin diameter:	1.5 - 31.5 mm (option up to 32.5 mm)
Coin thickness:	1.5 - 2.5 mm (option up to 3.3 mm)
Temperature:	-25°C up to +70°C
Power supply:	12 - 24 V DC +/- 10% (optional: 10 - 48 VDC)

With the NRI G-13.mft you can relax – your machine is working with the best in class coin validation technology.
