

SECURE, COMPACT FOOTPRINT NOTE RECYCLING LOWERS CASH HANDLING COSTS

The SC product line has redefined expectations for note acceptors by improving acceptance rates, jam rates, security and the cost of operation. The reliability that has resulted in an installed base of more than 1.5 million units worldwide is now the engine that drives a two-denomination recycler engineered to further reduce the costs associated with cash management.

SCR leverages multiple CPI technologies to offer newfound benefits – the proven performance associated with the SC architecture along with seasoned recycling mechanics developed for the VNR and BNR. The merging of these technologies now opens a world of possibilities for the market segments CPI serves.

BENEFITS OF TWO-DENOMINATION RECYCLING:

Change giveback in the form of notes is known to reduce otherwise frequent coin replenishment calls. Enabling change with note recycling has proven to decrease cash float inside the kiosk, improve machine uptime, reduce the time associated with cash handling and cost effectively automate transactions. And for many applications, these benefits are fully attainable with two-denomination recycling. Fortunately, SCR's compact footprint makes it an ideal choice for any application.

A NEW LEVEL OF SECURITY:

The costs associated with cash management can have a dramatic impact on profitability. SCR addresses this concern with a more efficient way to accept, process and handle cash payments ... and it does so with unprecedented speed to improve customer satisfaction. Numerous features have been added – from CPI's experience in both remote and difficult operating environments – to protect operators from losses associated with skimming attempts. These features include a removable anti-stringing module, lockable transport doors, "door open" detection even when in a powered down state and entrance/exit sensors to ensure accurate accounting.

TECHNICAL SPECIFICATIONS

SCR is designed to ensure the entire note path is easily accessible for maintenance without breaching security protocol.

- Acceptance Rate: 98% or greater ¹
- Note Memory Capacity: Up to 100 notes, four ways
- Note Dimensions:
 - 62mm–83mm width
 - 120mm–166mm length
- Transaction Speed:
 - As low as 2.3 seconds to recycle
 - As low as 1.4 seconds to dispense
- Interface: RS232/USB²
- Protocol: Recycling EBDS (REBDS)
- Power Supply:
 - 24VDC \pm 10%
 - Standby: 10W max
 - Accepting: 30W max
 - Stacking: 125W max
- Environmental:
 - Operating Temperature: 0°–60 °C
 - Storage Temperature: -30 °C–70 °C
 - Humidity: 5–95% relative humidity
- Product Weight:
 - 7.57 kg (16.69 lbs)
 - 9.33 kg (20.56 lbs) packaged

SCR COMPONENTS:

- Cashbox: Lockable, removable and durable with 600-note capacity.
- Recyclers: Two 60-note recycling drums. Recycles up to two denominations.
- Security Gate Module: Mechanical security, anti-stringing protection.
- Acceptor Head: Multi-width (83mm) SC Advance acceptor head.
